DETAILED ACTION

Applicant's arguments filed on May 2, 2006 have been fully considered. In response to the arguments, the finality of the previous action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Singh et al. (Singh) (6,482,558).

Singh discloses a method of fabricating a device using a lithographic process (Fig. 1), applying a radiation sensitive resist (18) on top of the device (14), the resist material incorporating a conductive material (col. 4, lines 20-31), exposing a part of the resist to radiation while applying an electric field across the resist (Fig. 1).

Allowable Subject Matter

Claims 1-14, 16-19, 22 and 23 allowed.

Claims 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art of record teaches or discloses exposing a part of a resist to ultraviolet radiation and applying an electric field across the resist.

Art Unit: 2851

Regarding claim 20, none of the prior art of record teaches or discloses applying an electric field by directly coupling the resist, which incorporates a conductive material, to a fixed potential in combination with the steps of claim 15.
